

Viewmaster Series

ICW

Viewmaster Series

DESCRIPTION:

The MultiView Series allows arrangement of Multiple LCD Monitors in linear or parabolic arrays for simultaneous viewing. The versatile design allows the use of different size panels in various configurations in either one or two levels. Each panel may be individually adjusted in tilt, swivel and radial orientation for optimal ergonomic viewing. The attractive die-cast aluminum parts in the MultiView series provide strength and durability for commercial applications.

Ball-joint Pivot

FEATURES:

- Easily configured linear or parabolic array mounting of multiple panels
- Multiple configurations for 2, 3, or 4 panels
- Ball-joint mounting system for rotate and tilt adjustment of individual panels
- Reconfigurable design for future expansion
- Supports panels of up to 25 pounds (11.4kg)
- Attractively styled die-cast aluminum alloy construction
- Mounting options for desk stand, grommet, clamp, wall and track mounts
- Conforms with VESA FPMPI mounting standard
- Cable management capability

Adjustable Crossing

SPECIFICATIONS:

Finish:	Black
Weight capacity:	25 lbs per pivot
Pole heights:	14" (356mm)
Crosswing widths:	Long CW (17.3", 439mm); Short CW (10.6", 270mm)
Mounting options:	Desk clamp, Grommet, Desk Stand
